Education

2024-26

Bachelor of Mechatronics Eng
4th Sem with CGPA - 7.82

2023-24
12th PCMB

Dr.Bapuji Salunkhe College Miraj

Skills

- Web Development
- Auto-Cad,Fusion 360
- Blender
- ROS2 Fundamentals & with open CV
- C Language
- Python

Language

English

Hindi

Marathi

Kannada

Siddhant Nandgave

Mechatronics Engineer Student

Mechatronics Engineering student interested in integrating engineering with marine biology and medical technologies. Motivated to explore how robotics, automation, and embedded systems can contribute to healthcare solutions and marine ecosystem research.

Achievements & Work Done

2024-25

4th from top 20 teams in WCE National Level Hackathon

Project titled conversion of current digital meters into smart meters by using Smart meter communication protocol using LORA and network hopping.

Composed a Universal Base Plate for Drone

A universal base plate compatible with any drone for easy swapping for attachments which could be used for drone delivery in commercial, medical or any other sector.

2025-26

Runner ups in Intra-Club Hackathon

Made daily attendance collection easy by using RFID and ESP32 which takes the data of each student and automatically marks his/her attendance making sure no cards are scanned twice for the same session.

Got a Patent Filed

Invented a smartphone-powered portable air quality monitoring system that captures real-time environmental data, computes AQI, and generates geo-tagged insights. Leveraged cloud integration to enable large-scale crowdsourced air quality mapping, offering a scalable and cost-effective solution for environmental monitoring.

Attended 3-Day ROS2 Workshop

Coordinated and completed a 3-day hands-on ROS 2 workshop, enhancing technical proficiency in robotics frameworks while demonstrating leadership and organizational skills.

2025-26

Intern at Robotry.ai

Developed and tested robotics applications using ROS 2 Jazzy on simulation and real hardware, including a hand gesture-controlled robotic arm and other automation projects.

One-Month Training on Embedded Systems and STM32

Completed industrial training focused on C programming and hands-on STM32 microcontroller development, including embedded systems concepts, peripheral interfacing, debugging, and a final project demonstration.

Conducted 3-days Robotics And AI workshop for NIT Raipur

Conducted a 3-day online workshop on Robotics and AI for students at NIT Raipur.

Conducted 5-days ROS2 workshop for AISSMS College Pune

Delivered a 5-day offline, hands-on ROS2 training program at AISSMS College of Engineering Pune.

Certifications

- Matlab onramp
- Matlab simulink
- Aquiring Data(AI Fundamentals of AI ASCEND)
- Data-Science for beginners
- Embedded System and STM32
- Industrial Automation
- Database Management

Non-Technical Activities/Skills

- National Level Dancer.
- Singer, Music Composer, Lyricist.
- Traveller

Member of IUCEE Club

Currently the Co-Curricular
Head of IUCEE Students
Chapter RIT
